

NIMA SAGHI

Front-end / Full-stack Developer · React, TypeScript, Next.js, Python

nimasaghi.dev@gmail.com · github.com/Nimasaghi-dev · linkedin.com/in/nima-saghi-dev · Nieuw-Vennep, NL

PROFILE

Developer with about two years of hands-on experience: a nine-month full-stack bootcamp, then almost a year building features on a live SaaS platform at an AI startup. Most of my work is in React and TypeScript, and I also work in the Python backend and the database when a feature needs it. I like breaking a problem into small steps, finding out why something is broken before I change it, and testing my own work before it ships. Open to frontend and full-stack roles.

EXPERIENCE

Front-end Developer · Mavisoft

Nieuw-Vennep, NL | 11/2025 – Present

Spectra: a multi-tenant geospatial SaaS platform. React, TypeScript, Next.js 14, Tailwind CSS, Python gRPC services, PostgreSQL. Started as an intern, then signed a one-year contract.

- Worked on session-start performance: parallelized independent requests and cut median session-chain latency from about 835 ms to 342 ms on a constrained network, using a benchmarking setup to measure cold loads, request counts, and transferred bytes. Also reduced unnecessary full-resolution image transfer in the gallery
- Found and fixed a data integrity bug where a clustering step was silently merging unrelated records: rewrote the logic, added a table and migration, and checked live data before shipping. Also traced an out-of-memory crash in a Python worker to the actual allocation problem
- Built a keyboard-driven review tool for going through large detection datasets quickly. The requirement was under 2 seconds per action; it runs at a few hundred milliseconds
- Worked on a multi-step login flow with password plus TOTP 2FA: implemented parts of the challenge handling, trusted-device tokens, session recovery, password-change invalidation, and multi-tab safeguards
- Reworked the Dataset Overview: split dataset details from inference runs into clearer screens, added permission-aware actions and better empty states, and covered it with automated tests
- Built a PDF report generation feature end to end: the UI trigger, the gRPC service, the templating, and the file storage
- Cleaned up the design system: audited design tokens and added lint rules so new inconsistencies get caught automatically
- Rebuilt the platform's UI during my internship and refactored a 2,500-line component file down to around 900 lines

Full-Stack Web Development Trainee ·

HackYourFuture

Amsterdam, NL | 06/2024 – 06/2025

Nine-month intensive bootcamp. React, Node.js, Express, MongoDB, REST APIs, Git, Agile/Scrum.

- Built full-stack web apps in small teams with code reviews, pair programming, and Git-based workflows

PROJECTS

Nom Nom, food ordering app · [GitHub](#)

- Full MERN stack app I built myself: React frontend, Node.js/Express REST API, MongoDB, JWT auth, cart and checkout, live order tracking. Tested with Jest and Cypress, deployed through GitHub Actions

Mavisoft corporate website (personal build) · [Live](#) · [GitHub](#)

- Corporate site built from scratch with Next.js 15, React 19, TypeScript, and Tailwind CSS v4. Responsive, with scroll animations and a working contact form

FastAPI backend (learning project)

- Built a Python/FastAPI backend on my own time to get more comfortable with backend work outside the gRPC stack I use at work

SKILLS

Frontend: React, TypeScript, Next.js, JavaScript, Tailwind CSS, HTML, CSS, responsive design

Backend: Python (gRPC, FastAPI), Node.js, Express, REST APIs, JWT auth

Databases: PostgreSQL, MongoDB, schema design, migrations

Tooling: Git, GitHub, GitLab, GitHub Actions, Docker, Linux (Ubuntu daily)

Testing: Jest, Cypress, manual verification against real data

AI tools: Claude Code and Cursor, daily. I plan the change first and review what they write before I commit it

EDUCATION

Full-Stack Web Development · [HackYourFuture](#)

Amsterdam, NL | 2024 – 2025

BSc Computer Software Engineering · [Azad University of Tehran](#)

Tehran, IR | 2010 – 2014

LANGUAGES

English: professional working proficiency **Dutch:** working proficiency **Farsi:** native
